Invitation for childhood preventive medical examination

Dear mother, dear father:

The health and proper development of your child is important to us as well as to you. The health insurance funds offer ten preventive medical examinations - free of charge - for all children from the day of birth up to the sixth year of life for an examination of the development of children. These exams are important in order to detect any possible anomalies or illnesses as early as possible. Your physician will furthermore be able to support the developmental steps of your child and discuss important topics (e.g. vaccinations or nutrition) with you.

A preventive medical examination is due for your child.

As preventive medical examinations for children are mandatory in Hessia, we would like to ask that you have your child examined by your physician.

The Hessisches Kindervorsorgezentrum is, among other things, responsible to ensure compliance with this legal stipulation. Therefore, please take the bottom part of this letter along with you to the preventive medical examination. Your physician will fill it out and return it to the Hessisches Kindervorsorgezentrum. If your child is examined outside of Hessia, we ask that you have the physician sign and stamp the confirmation and then send it to the Hessisches Kindervorsorgezentrum.
